- Ultra slim design

e-Screen XTX touch monitor

XTX-5500UHD black

- The Ultra High Definition display offers the best image quality available
- e-Screen XTX-series offer a durable solution that perfectly fit into a collaboration and conferencing environment
- The InGlass™ touch system is not only extremely fast and accurate, it allows you to operate your software with your fingertips and directly annotate with a very small 2mm stylus. To make your screen clean as a whistle, just sweep with the palm of your hand. All intuitively and without tapping a button (object recognition features are available in Windows 10)
- XTX series screens are perfect for video conferencing. The two integrated Full HD wide angle cameras are positioned to capture both people standing close to the screen, as well as people sitting at a meeting room table
- The integrated stereo sound system is tuned for video conferencing. The front facing system will also work great in open office environments because the direct sound is aimed towards the audience
- A fully integrated high performance microphone system makes it very easy to start your conference calls. The 4 channel microphone array with Acoustic Echo Cancelling, Noise Suppression and Auto Gain ensures clear and audible sound during video- or audio conference calls
- Go Unlimited! Together with the Legamaster OPS PC and Flipbox Software Suite the XTX-series e-Screens offer unlimited possibilities and is a true all-in-one touch screen solution
